

Oceaneering Finds a Partner with TriMech and SolidWorks

Industry : Oil, Gas, Defense
Previous CAD : AutoCAD
Website : www.oceaneering.com

Oceaneering International

Chesapeake, Virginia

The Challenge

Oceaneering is a global oil field provider of engineered services and products primarily to the offshore oil and gas industry, with a focus on deepwater applications. Through the use of its applied technology expertise, Oceaneering also serves the defense and aerospace industries, playing a key role in supporting the US Navy. Oceaneering was in need of a tool and partner that would help meet the design demands of developing state-of-the-art mechanical components, while getting support and expertise when they needed it.

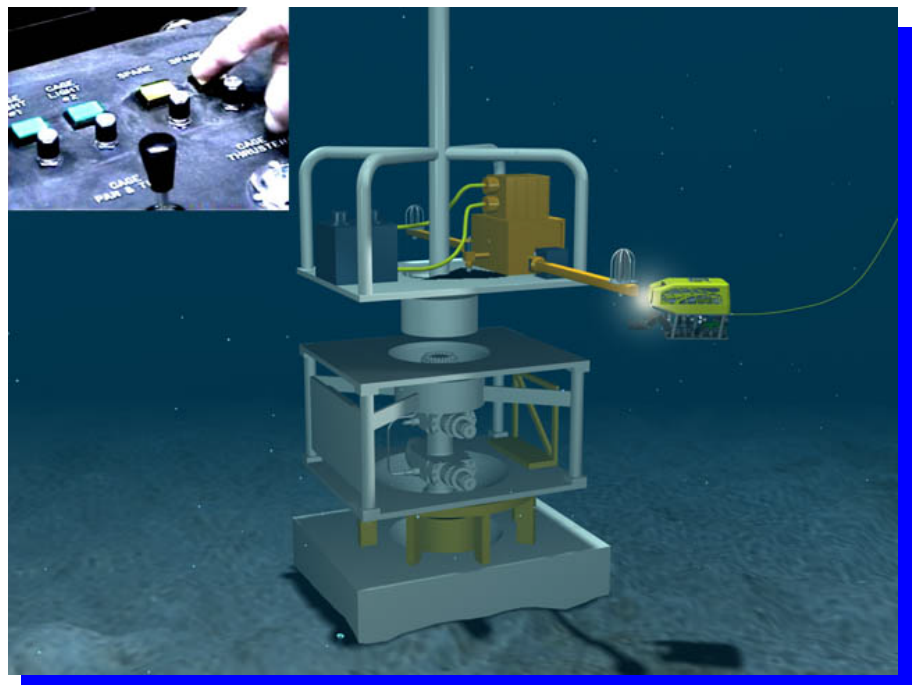

The Solution

TriMech Solutions provided SolidWorks design software to Oceaneering's Marine Services Division. With TriMech's professional technical support and training classes, Oceaneering was able to streamline a number of design processes to meet their customers' expectations and deadlines.

"We strive to build close relationships with our business partners.

Interacting with TriMech makes this an easy job for us"

Thor Mohar
Designer

Summary and Metrics:

- Streamlined modeling, and drawing processes
- Received timely technical support
